

Digital future of
hydro power.

Why we digitalize:

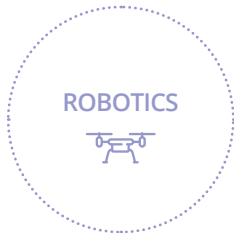

Keeping hydropower reliable. For tomorrow and beyond.

- **Knowledge is retained.** Not just in people's heads.
- **Experience leaves.** Know-how stays.
- **Teams achieve more.** Despite the skills shortage.
- **Assets run longer.** Despite aging equipment.

From the industry. For the industry.

We support you. In digitalizing your power plants.

- **A 360° portfolio.** From development to support.
- **One team.** All phases.
- **Built by operators.** For operators.

Robotics

Expanding the perspectives of power plant employees with advanced technologies.

Workforce

Provide end-to-end digital support for the operational processes associated with operation and maintenance of hydropower plants.

Analytics

Transforming raw data into actionable insights – centralized, visualized, and ready to drive smarter decisions in hydropower.

Infrastructure

Equipping the teams in the hydropower plants with mobile devices and secure communication infrastructure to enable the digital way of working.
