

Reinventing Hydropower Plant Monitoring

Practical challenges

Reduce hydro-abrasive wear. Maintenance at the right time.

- **Your assets run longer.** Despite hard particles in the waterway.
- **Your teams achieve more.** With a clear view of critical risks.
- **Your profits are retained.** Instead of being lost to maintenance.

Stay Ahead. Stay Efficient

We support you. Do fact-based decisions.

- **A 360° approach.** From measurement to decision-making.
- **One team.** All critical phases. From identifying the need to ensuring profitability.
- **Axpo & etaeval.** Combined knowledge for operators.

Solution modules

Hydro Insights

Built for hydropower, a powerful data platform that centralizes and transforms real machine data into actionable insights.

Suspended sediment-monitoring

Advanced sediment monitoring to safeguard turbines, manage sediment-related risks, and ensure sustainable operation.

Turbine efficiency monitoring

Expert-driven efficiency monitoring to evaluate turbine performance, plan maintenance actions, and maximize profitability.

Powered by Axpo and etaeval
